

~~TOP SECRET~~Week ending 5.8.44.EO 3.3(h)(2)
PL 86-36/50 USC 3605Watch Air Keys.

The only Air key still defying us is Gnat, Fliegerkorps X. Lily, which has no Uncle, is difficult enough without one; for Firefly we are largely dependent on cillies, and for Glow-worm on re-encodements from Firefly. Firefly does not seem to be using his large store of Uncles but we do not yet know about Glow-worm. There is fairly good evidence since the 5th. that Wasp, who started without his has now put it on his best crib frequencies and we may be in for trouble. Jaguar, a heavy user of D and of Uhr, has got stuck for the last day or two. We are likely to have to fight hard to retain our hold. The early breaks of Ocelot (average time 1310) together with its Uncle - less condition are a great boon.

Horrible example.
