R.S.#9032

UNIVERSITY OF ILLINOIS
DEPARTMENT OF MATHEMATICS
URBANA, ILLINOIS

November 5, 1952

Armed Forces Security Agency
Washington 25, D. C.

Att'n Mr. W. F. Friedman

Dear Mr. Friedman:

A number of names have occured to me of mathematicians
not involved in the 1952 SCAMP who might be interesting for next
summer. Thus far I have had no chance to find out whether any of
them would be both available and willing but I pass their names along
to you in accordance with our recent conversation.

R. H. Bruck, Associate Professor, University of Wisconsin
Sarvadaman Chowla, Visiting Professor, University of Kansas,
    Lawrence, Kansas. (I believe he is Indian by birth.
    Would this rule him out?)
E. E. Moise, University of Michigan, Ann Arbor. (He is
    known to Campaigne and has had relevant naval experience.)
Gordan Pall, Illinois Institute of Technology, Chicago, Ill.
H. J. Ryser, Ohio State University, Columbus, Ohio

With the exception of Moise, the above were suggested by Albert be-
cause of their research being closely related to finite projective
planes. I should hope that Albert might also be one of next summer's
group. Saunders MacLane and Marshall Stone, both of the University
of Chicago, may already have the necessary clearances and might be
useful if they are willing.

Last summer I felt from the start that a few really
good statisticians would be useful but they were not available at
such short notice. I may wish to consult with Sam Wilks at
Princeton concerning suitable personnel. I believe Wilks has the
necessary clearances.

I hope to see you on Monday but I am transmitting
these names in advance just in case you wish to do something in
connection with them.

Yours sincerely,

S. S. Cairns
Head of the Department
