~~TOP SECRET CANOE - SECURITY INFORMATION~~

MEMORANDUM FOR [redacted]

SUBJECT: Release of [redacted]

1. Reference is made to your MOP 3170 of 15 January 1953.

2. The reference has been submitted to USCIB, but I regret that it has not been possible to secure immediate action as several questions have arisen which must be answered. The implications of the release under the [redacted] appear to be much greater than those under the previous USCIB proposal. The latter did not contemplate any COMINT exchange as such, but merely involved release for a single operation [redacted] of a particular nature which it was recognized involved possible danger of disclosure since the recipients might identify it as to general source.

[redacted]

action and raises the following questions which are under active study:

- a. How can [redacted] be isolated effectively from NSA results in view of the complete technical exchange now in effect?
- b. What is degree of security [redacted] are observing in handling and disseminating the results of their cryptanalytic efforts?
- c. To what extent is cryptanalytic assistance really needed in view of the success that [redacted] are reported to be achieving?
- d. What effect will any extension of relations on the [redacted] [redacted] have on exchange arrangements currently in effect with respect to other problems?

[redacted] would be appreciated on these points.

[redacted]
