

STANDARD FORM NO. 64

Correspondence File under HUETTENHAIN

Office Memorandum • UNITED STATES GOVERNMENT

TO : Mr. Friedman.
 FROM : TEC
 SUBJECT: Attached

DATE:

-34!

1. Sorry for the delay.
2. We have a mild interest in the photos referred to if it is not too much trouble.
3. Attached note from Miss Jordan is self-explanatory for items b thru f. We can make efforts to obtain copies if you wish to send them.
4. Strangely enough the Agency does not have a copy of item a. It is in the Army Library. It's cost was \$6 and is now out of print. I am making an effort (over)

to get one & will increase the order to two if you wish to give one to Dr. Huettenheim. Mr. Goldner tells me that he worked with Wolfe prior to his entry into the Army. Goldner says that it is of small value, but I think the Agency can well buy every book on the subject.

5. Please let me know your desires.

Very respectfully,

J. H. Pendergiers

WASHINGTON 25, D. C.

10 December 1953

TO: Deputy Director, Production
Attn: Mr. Fred C. Woodrough, Jr., NSA-0621

SUBJECT: Material and Request for Mr. Friedman

1. Dr. Huettenhain, of the Athenaeum organization, stated that Dr. Highley, during the latter's TDY in Germany, had relayed a request from Mr. William F. Friedman to have photos of Abbot Trithemius' gravestone for inclusion in Mr. Friedman's "Historical Collection of Early Cryptographic Contributors." On 18 November Dr. Huettenhain furnished the attached photographs and asked that they be forwarded to Mr. Friedman.

2. At the same time, Dr. Huettenhain asked if Mr. Friedman could supply the following to him:

- a. A First Course in Cryptanalysis, by J.M. Wolfe (Brooklyn College Press).
- b. Technical Report No. 181 - Application of statistical methods to communication problems, by J.W. Lee, MIT Research Laboratory of Electronics.
- c. Technical Report No. 226 - Coding with linear systems, by F. P. Costas, MIT Research Laboratory of Electronics.
- d. Technical Report No. 65 - The Transmission of Information, by R. M. Fano, MIT Research Laboratory of Electronics.
- e. "A Device for Quantizing, Grouping and Coding Amplitude-modulated Pulses," a MIT electrical engineering thesis, by L.G. Kraft.

3. It is requested that the above information and the attachment be conveyed to Mr. Friedman. This office will be glad to forward any of the documents listed in para 2 above which Mr. Friedman wishes to make available to Dr. Huettenhain.
