1. Your 700/1 ratio of dollar spending is our best estimate of value of Comsec during WWII.

2. It is reasonable to accept this as an ~~~~ (admittedly unreliable) estimate of the value of at least the research effort of AFSA, if this is successful.

3. AFSA's research budget is said to be of the order of magnitude of 1.4×10^7 per yr.

4. $1.4 \times 10^7 \times 700 = 10^{10}$ per yr.

5. As an off the cuff guess 10^{10} is about 5% or 1/20 of the total national annual income — this may be a very poor estimate.

6. There are about 50 military men on active duty with rank at least 3 stars or comparably many civilians in super-grades. This is an unreliable estimate.

7. AFSA does not have a fair percentage of three-

8. AFSA has no charter authority to protect this tremendously important position & authoritarian control

y possible of all will come about that at best through the influence an officer of high rank (at least 3-stars) implicitly wields — especially y he is one who is ascending.
